How to cut a plot?

1) Once the trail has been drawn and saved, click on the "Operation" tab.

2) Select the "split the track" proposition.

3) Once done, place the cursor on the places you want to cut.

4) When finished, click on "finish cutting".

5) Following this, you will be offered to "delete the selected part" or "create a new trail" with it.

6) Select the proposition that interests you.

7) Make sure you click "ok" to confirm your choice.
