

How to create points of interest?

Two options are available to you.

Via the track of the trail:

- 1) Click on the "points" tab .
- 2) Select "+ new point of interest".
- 3) Click on the location of the POI or search for a location via the search bar.
- 4) Click on the "description" tab to add more information and photos on this point of interest.
- 5) Be sure to record the point of interest once you have finished validating the previous steps.

Via "create a place":

- 1) Go to "create a place".
- 2) From there, find the location of the point of interest using the search bar.
- 3) Then fill out the proposed fields without forgetting to insert photos so that your new point of interest is as attractive as possible.

Note: Compared to the track, it is necessary for the trail to be saved before creating points of interest.
