How to make the slopes visible on the map when creating a trail?

1) Go to the "create a trail" part of the site.

2) From there, you have the possibility to make appear the slopes on the map thanks to the cursor present at the top of this one.

Notes: The appearance of slopes varies depending on the position in which you place the cursor.

If you drag the slider all the way to the left, the slopes do not appear while if you move the slider all the way to the right, the slopes appear to the maximum.

Attention, so that these slopes are visible, it is necessary to zoom a minimum on the map.
