

How to search trails from a certain position ?

- 1) Once on the app, go to the "**Trail discovery**" section. 1536586341ic_discover_white_24dp.png
- 2) Press on the first button at the top of your screen

It allows to scan a SityTrail QRcode present on a PDF print realised from our Website.

A lot of SityTrailPro clients, or also communities, proposed offer paper maps in A4 OR a3 format with hiking suggestions.

Scan the QRCode from the paper map allow to open directly the selected trail in the mobile application. Let's go to discover the region !
