

How to export a trail in GPX format?

Three possibilities are available to you:

1) Go to your "dashboard".

Click on the icon  to the left of the trail you want to export.

Then select the "download GPX" option.

2) Go to your "dashboard" and open the trail you want to export.

From there, click on the "download" icon  and choose the "Download GPX" option.

3) Go to your "dashboard" and open the trail you want to export.

Once on its description card, open the trail in large format by clicking on the cross at the top left of it**.

Once on the map, click on the "download" icon  and choose the "download GPX" option
