

I have to renew my subscriptions. Why have prices changed for some subscriptions ?

All subscriptions are now increased to **€24.99 per year per country** and also **€24.99 per year for the World version** for several reasons :

- Each subscription to a country gives as always access to the **Topographic maps of the IGN of this country**. But it also gives access in addition to the **OpenStreetMap** (<https://www.openstreetmap.org>) that you can exploit for this country but also for all your trails abroad and this **everywhere in the world**.
- For the World version only, following the request of many users, we added, in addition to the **SityTrail Topo World maps, marked trails** (GR hiking paths, European hiking routes, routes of Santiago de Compostela, ..., cycling networks : Greenway network in France, Ravel in Belgium, European cycling routes, knot points networks in Flanders and Netherlands, ..., ski slopes). We have also added an other map very usefull during a trail. Namely : the **Slope Map** which is exploitable overlay your topographic maps and this as well on the web as on your smarthphones/tablets in offline mode.
- A point more technical but very important, **we have migrated our servers on the Google Cloud infrastructure**. This is to greatly improve the stability of our services and to avoid the failures we encountered with our old infrastructure. Of course, this entails significant additional costs.
- Following our survey of more than 1000 users, we brought to the applications **many new features and these are finally available via our website** : <https://www.sitytrail.com> . We invite you to discover them !

We are currently considering the possibility of offering **combined subscriptions to several countries and/or to World maps for a reduced price** in the near future but these subscriptions are not yet defined.

Thank you for your understanding, your trust and your loyalty.
