

How to install the SityTrail application on Android ?

- 1) Visit the Playstore for the Android application.
- 2) Write the name "**SityTrail**" in your search bar.
- 3) From there, select your application and press "**Install**".
- 4) Once the application is installed, you have to register and create a new account or you can (re)connect to your existing account.

Welcome.

Important note :Why the Android application require access to my contacts ?

It is a bug at Google. It will be corrected soon.

However, Geolives certifies that the SityTrail application does not use the data of your contacts.
