

## How to install the SityTrail application on iOS ?

- 1) Visit the AppStore.
- 2) Write the name "**SityTrail**" in your search bar.
- 3) From there, select your application and press "**Install**".
- 4) Once the application is installed, you have to register and create a new account or you can (re)connect to your existing account.

**Note** : When the application is first launched, please choose "Always allow" to keep the GPS always active even when the screen is off.

Welcome.
