How to install the SityTrail application on iOS ?

1553074222installation%20iOS.jpg
Zoom in the picture

1)   Visit the AppStore.

2)   Write the name "**SityTrai**l" in your search bar

3)   From there, select your application and press "**Install**"

4)   Once the application is installed, you have to register and create a new account or you can (re)connect to your existing account.

Note : When the application is first launched, please choose "Always allow" to keep the GPS always active even when the screen is off.

Welcome.
