How to share his location/SOS ?

1) Open the main menu via this icon: 1536586635ic_newsfeed_black_24dp.png

2) Select the "**Share position** / **SOS**" tab.

3) Next, tap the icon   1536587667ic_sms_black_24dp.png at the bottom right-hand corner of your screen.

4) Select the mode by which you want to share your location.

<u>Important note for a SOS message</u> :

Whether in the mountain or in an area that does not have good internet coverage (Data Network), it is better to send your GPS position by "Message" that is to say by SMS.

Indeed, SMS network coverage is much safer and generally works around the world.
