

How to download offline maps ?

- 1) Open the main menu via this icon : 1536586635ic_newsfeed_black_24dp.png
- 2) Select the "**Download maps**" tab. From there, all your downloaded areas are listed.
- 3) If you want to download a new zone, tap the icon 1536589515ic_add_black_24dp.png at the bottom right-hand corner of your screen .
- 4) Then select the map types you want for the download.
- 5) To continue the download, press "**Next**" and select the download area.
- 6) To do this, you can search for a specific place by clicking on the magnifying glass 1536589083ic_search_white_24dp.png
- 7) Then you can choose a download radius by pressing "**Select area**".
- 8) If you want a more precise map, you need to check the box "**More accurate maps**" (Note : this option is not always available. It depends on the type of maps).
- 9) Make sure to press the "**Validate**" tab and enter a name for the downloaded area.
